Conrad Hotel, 87 Wireless Road, Phatumwan, 10330 Bangkok

AEMAS

ASEAN Energy Management Scheme

Excellence in Energy Management

AEMAS Training Workshop for Energy Managers – 23-25 August 2011

AEMAS Launching Conference - Thailand – 15 September 2011

www.aemas.org

What is AEMAS?

AEMAS is an ASEAN initiative benefitting from the support of the highest official energy authorities and agencies of ASEAN, including the 10 ASEAN Countries' Ministers on Energy (AMEM). This initiative aims to:

- Allow better visibility and recognition of the efforts made by ASEAN companies and their staff in relation to improving energy use; and
- Give business value to these efforts.

For this, AEMAS is based upon two key pillars:

- **Pillar 1:** The training and certification of energy managers
- **Pillar 2:** The certification of energy-intensive end-users (Energy Management Gold Standard)

Join AEMAS now to learn more and benefit from special opportunities!

AEMAS Training Workshop for Energy Managers – 23-25 August 2011

AEMAS Launching Conference - Thailand – 15 September 2011

www.aemas.org

Benefits of becoming an AEMAS Energy Manager:

Benefits of AEMAS Energy Management Gold Standard certification for organizations

Today, many organizations, in particular exporting companies, are required to comply with various international energy management standards.

How do you distinguish yourself from others?

How can you get a competitive advantage?

- Secure and enhance your international business with the AEMAS Energy Management Gold Standard certification
- The AEMAS Energy Management Gold Standard is in line with other international standards but adds on additional requirements to demonstrate your achievements and performance in energy management

You are committed to sustainable development. But does the world know about it?

- The AEMAS Energy Management Gold Standard certification demonstrates your commitment to sustainable development and validates your efforts
- The AEMAS Energy Management Gold Standard is endorsed by the European Union, UNEP and the 10 ASEAN Ministries of Energy
- The AEMAS Energy Management Gold Standard certification will portray your organization as a leader in sustainable development

You intend to upgrade your energy management system to international standards?

The AEMAS Energy Management Gold Standard will provide you with a competitive edge over your competitors

- Most international energy management standards certify that you have an Energy Management System in place. They do not recognize your performance and achievements
- The AEMAS Energy Management Gold Standard certifies that your Energy Management System is in compliance with international standards and that you have reached excellence in energy management through verified improvements in energy efficiency

**Participation free of charge for the first companies joining the AEMAS programme!
Register now to the AEMAS Launching Conference – Thailand to learn more about
how to participate.**

AEMAS Training Workshop for Energy Managers – 23-25 August 2011

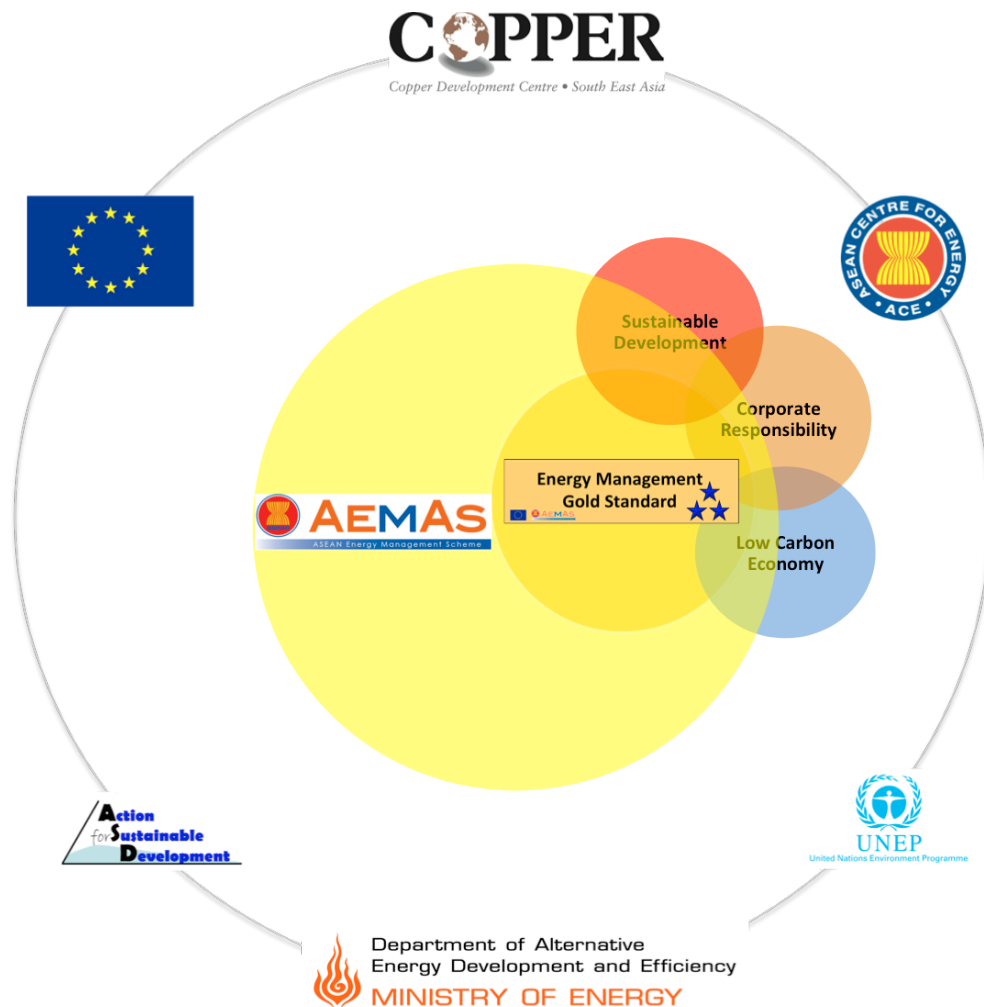

AEMAS Launching Conference - Thailand – 15 September 2011

www.aemas.org

AEMAS: An ASEAN initiative benefiting from Government Support and International recognition

AEMAS has been endorsed by the 10 ASEAN member countries' Ministers of Energy (AMEM). AEMAS and the Energy Management Gold Standard are in line with all international agencies and initiatives to combat climate change. As such, AEMAS and the Energy Management Gold Standard are supported by the European Commission and the United Nations Environment Program (UNEP)

Contact us now to participate in our next events. Learn more and gain international recognition of your commitment to sustainable development!
